\* The CHANGED FOR A PRV QTR figure is computed according to the following formula: PENDING COUNT AT END - CALCULATED PENDING  
 The CALCULATED PENDING figure is computed as follows:

$$\begin{aligned}
 & \text{BEGINNING PENDING} \\
 & + \text{FILED} \\
 & + \text{REINSTATE ADD} \\
 & - \text{CLOSED FOR CURRENT QTR} \\
 & \text{-----} \\
 & = \text{CALCULATED PENDING}
 \end{aligned}$$

The adjustment figure goes up as pending cases are entered into the system with file dates which precede the reporting period or cases are reinstated with start dates which precede the reporting period. It goes down as cases are closed or dropped from reinstatement using a close or drop date which precedes the reporting period. Cases reinstated during the period are counted in the REINSTATE ADD column. Cases pending on reinstatement are added to the PENDING column but are not shown separately. Cases dropped from reinstatement during the reporting period are counted in the CLOSED column but are not counted separately.

Discrepancies in FILED, REINSTATE ADD, CLOSED and PENDING may be resolved by running this program with a detail listing for the case type in error. Cases affecting the adjustment figure may be listed in the audit report program using a record type of \*MASTER.
